

TURNKEY PLANT

DEFINITION Turnkey: to provide a complete solution to a problem

By pure definition, turnkey means that a separate entity is responsible for setting up a plant or equipment and putting it into operations. It can include contractual actions at least through the system, subsystem, or equipment installation phase, and may include follow-on contractual actions, such as testing, training, logistical, and operational support.

We start up and we finish your project. Our engineers are experienced and highly innovative. We can implement recycling and cost-cutting into your project. Our employees are dedicated to providing you with the highest quality service and products available.

Seawolf Design, Inc. is a specialist in turnkey spa and tub manufacturing plants. We have years of experience, and are able to provide design, training, setup and consulting services.

Contact our head engineer Mr. Wolfgang Unger for details at admin@seawolfindustries.com or on his cell phone at 386-689-2399 and get your project off to a good start.
